the commercial web server causes the client terminal to render the graphical user interface which prompts the user to enter the notes field prior to transmitting the transaction data to the financial management application.

7. (currently amended) The financial management system of claim 5, wherein a web browser residing on the client terminal renders the graphical user interface which prompts the user to enter the notes field ~~reminder~~ prior to transmitting the transaction data to the financial management application.

8. (currently amended) The financial management system of claim 7, wherein the web browser renders the graphical user interface which prompts the user to select one of a number of predetermined categories associated with the financial management application.

9. (currently amended) The financial management system of claim ~~8~~10, wherein the web browser creates an associated list of merchants and categories based on previous selections.

10. (original) The financial management system of claim 7, wherein the web browser provides a suggested name based on the name of the merchant.

11. (original) The financial management system of claim 10, wherein the web browser creates an associated list of merchants and categories based on previous selections, and provides a suggested category based upon the associated list if the merchant has previously been associated with a category.

12. (currently amended) The financial management system of claim 1, wherein the ~~transactional~~ transaction data includes a purchase amount, a purchase date, a payee, a card identification data, a per item expense, a per item quantity, and at least one notes field.

13. (withdrawn) A financial management system comprising
a terminal device;
a financial management program; and

4

a commercial web server capable of conducting online financial transactions, wherein the financial management program receives transaction data regarding the online financial transaction upon completion of a financial transaction.

14. (withdrawn) The financial management system of claim 13, wherein the terminal device is a wireless terminal device.

15. (withdrawn) The financial management system of claim 14, wherein the terminal device is assigned to a user, and the financial management program is assigned to the user, and the financial management program does not reside on the terminal device.

16. (withdrawn) A financial management system comprising:

a terminal device;

a financial management program; and

a scripting agent, wherein the scripting agent receives transaction data from the terminal device and automatically forwards a copy of the transaction data to the financial management program.
